

Empress Series Cutting Parts

Inside of every Rome grinder are cutting parts designed and manufactured to withstand the harshest grinding environments. The quality of the grind can be greatly impacted by the quality and condition of the cutting and wearable parts. This is why Rome's Empress Series plates are made under one roof and milled to the industry's tightest tolerances.

The Empress Series plates are manufactured to last longer, hold a sharper edge, and are flexible enough to handle even the harshest grinding environments. Each designed for specific grinding applications, the Empress Series features three unique plate models: Champion, Legend and Imperial.

Champion Plates

Champion Plates are specifically designed for rendering and bone grinding. The ductility of this plate is very flexible to withstand the rigors of grinding the toughest materials. Champion Plates integrate core flexibility with a hard cutting edge for the best performance, longevity and strength.

Legend Plates

Legend Plates are designed for minimal flex and to maintain a sharp cutting edge when grinding everything from frozen block to fresh meat. Legend Plates have been tested and proven to withstand the harshest environments in the grinding industry. Seen as the workhorse in many grinding applications, Legend Plates provide great product quality at an affordable price.

Imperial Plates

Rome's Imperial Plates are specifically designed to hold the ultimate cutting edge, which makes them perfect for final grinding solutions. Because Imperial Plates hold a sharper cutting edge longer than other options they can provide consistent quality product texture. Like the Roman Imperial Guard, the Imperial Plate is synonymous with strength, durability and consistency.

Grinder Parts & Services

Rome Grinders at a Glance

- **Titan Grinders** – A true workhorse, Rome's most popular grinder
- **Maximus Grinders** – Ideal for large processors
- **Brutus Grinders** – Small but mighty, movable grinder
- **Smart Grinders** – Features the Rome Reclaim System (RRS)

RRS – Rome Reclaim System

- Optimizes your grinder in as little as 10 minutes
- Removes bone with maximized yields and minimized waste
- Allows for 100% batch control
- Add-on to existing grinders or standard on Rome's Smart Grinders

Hercules Gearbox – New and Rebuilds

- Class 12 bull gears, pinions and heavy duty cast steel case
- 35% more tensile strength vs. the competition
- Cooler operating temperatures means a smoother running gearbox
- Minimal noise – whisper quiet during operation
- Repair Kits and Repair Service available

Added Value Services

- Complimentary processing line and grinder audits to help you optimize your production rates, improve current processes, and decrease operating costs
- Equipment rebuilds – quick and knowledgeable grinder and parts repair/refurbish
- In-house engineering – helps ensure a grinder configured specifically for your facility
- Free machine delivery to many areas in the lower 48 states
- Large in-stock parts inventory with same-day shipping for orders before 2 pm CT

Built Right • Built in the USA • Built to Last

Every piece of equipment produced by Rome Grinding Solutions is tried and tested in the harshest environments. Rome is the only grinder manufacturer that machines feedscrews and barrels from one-piece of solid steel, thus eliminating the need for welds. The steps in the manufacturing process allow Rome to produce the strongest, most dependable feedscrews and barrels on the market.

Rome's grinders are designed and built to handle the toughest meat and related products. This solid engineering and proven operation make Rome's grinders ideal for:

- Meat, poultry and other foods
- Pet Food
- Non-food products
- You name it – we will work to make a grinder for your application!
